- September 2019 - May 2023 **Jaypee Institute of Informational Technology** Noida
- B.Tech in Computer Science**

Projects and Certifications

Resume Builder

Tools and Technologies used – Django, HTML5, CSS Bootstrap, PostgreSQL, React.js

A website designed towards helping people draft actionable resumes with various template options. It also had an inbuilt chat bot feature that integrated chat GPT's generative AI abilities to help with the content of the resume.

Seminar Hall Booking System

Tools and Technologies used – HTML5, CSS Bootstrap, Node.js, React.js, PostgreSQL

A website developed to streamline the online auditorium and hall management booking system across universities and schools. It lets users book a seat of their choice in advance for upcoming events.

Identity Reconciliation

Tools and technologies used – HTML5, CSS, Node.js, PostgreSQL

A website designed to help firms verify users' email ID and keep track of a customer's identity across multiple purchases. It collects the data and contact of users and stores it in a database, and recognizes if the account is primary or secondary.

January 2025	IBM Full Stack Developer from Coursera Built my own portfolio website and a seminar hall booking system.
August 2024	Accenture North America Data Analytics and Visualization Job Simulation on Forage Cleaned, modelled and analyzed 7 datasets to uncover insights into content trends to inform strategic decisions.
July 2024	SQL Basics from HackerRank Built a first-hand understanding about the workings of a database.
